Summary:

    For our **Grad Goals** website, this activity diagram illustrates how users will access the budgeting feature. Users begin by navigating to the webpage and completing a short questionnaire of around ten questions covering their income, expenses, debt, and investments. As they progress, responses are stored after each question. Once complete, the system inputs their answers into an Excel template, automatically generating a personalized spreadsheet to help users budget and manage their finances.

Grad Goals

To Export Budgeting Data taken from a short quiz on the website to an excel spreadsheet

- Begin Budgeting Questionare
- Display Question
- Answer Provided?
- ◇
  - [No] → Prompt Again
  - [Yes] → Store Answer
- More Questions?
